FITTING GUIDE

HOW TO MEASURE

To obtain accurate body measurement, use a tape measure. Keeping the tape level but not stretched, follow the instructions below. Ask someone to help if necessary. For consistency, please keep take measure taut.

GUIDE FOR MEN:

A. NECK

Measure around the base of your neck. Keep one finger between tape and body.

B. CHEST

Measurement around your chest. Keeping the tape level and straight. Keep one finger between tape and body.

C. WAIST

Measure around your natural waistline at position your pants would normally sit. Keeping the tape level and straight. Keep one finger between tape and body.

GUIDE FOR WOMEN:

A. BUST

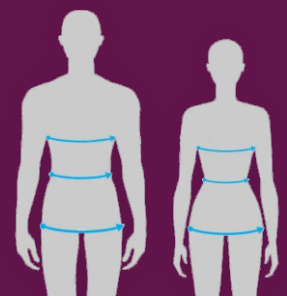

Measurement around the fullest part of the chest and around the shoulder blades, Keeping the tape level and straight. Keep one finger between tape and body.

B. WAIST

Measure 2cm below your belly button, keeping the tape level and straight, measurement against the skin and not over clothing. Keep one finger between tape and body.

C. HIP

This is around the fullest part of the hips. Wrap the measuring tape comfortably around this area. The tape must be horizontal against the body. Keep one finger between tape and body.

TAKING YOUR MEASUREMENTS - SOME PRACTICAL TIPS

1 Ask for help, taking your own measurement can be tricky

2 Wear only a light layer of clothing to ensure a true measurement is taken.

3 Use a tape measure, keep it flat against your body.

4 When the tape is around you it should feel comfortable, not too tight or too loose.

- SIZES FROM SMALL TO XXL

Work clothing was originally created to protect against dirt. Its role has rapidly evolved to provide ever greater safety to professionals exposed to health, safety or thermal risks.

There are also numerous French and European standards aimed at regulating the wearing of clothing specific to each profession.

Workwear is often made from durable and robust materials that can withstand harsh conditions and wear and tear. These materials, such as heavy-duty canvas, ripstop fabric, or flame-resistant textiles, can be more expensive than regular clothing materials.

Cool colours like various shades of yellow, blue, green and oranges are known for their calming and soothing effect. They can create a sense of trust and reliability, making them suitable for formal work environments. Colours in particular, are often associated with approachability and professionalism.

Protection, First and the most important reason for our clothing is it provides protection from heat cold, wind, and rain. ...
